The highest level of precision, efficiency and energy optimization.

Committed to become your world class partner, Bonfiglioli is a leading name in power transmission since 1956. Our best-in-class solutions are backed by nearly 60 years of engineering expertise as well as an in-depth understanding of the industries we serve.

Our solutions include precision planetary gearboxes, servomotors, servo inverters and regenerative inverters. A unique combination of mechatronic solutions plus a vast range of industrial products make Bonfiglioli a one-stop-shop for applications in many different sectors.

Our two centres of excellence, one in Italy and one in Germany, drive success in mechatronics by developing breakthrough innovations.

High innovative mechatronic tailored solutions from unique supplier to meet any kind of specific needs.

Mechatronic Solutions for all Industrial Applications

Bonfiglioli is a leading drive and automation specialist in mechatronic applications. We develop electronically-orientated products as well as mechatronic and vertically-integrated solutions. Utilizing its mechanical, electrical, electronic and applications competences, Bonfiglioli can assist you in designing cost-effective and energy-efficient machines and installations, aligning their performance to precisely meet your needs.

Mechatronics - The Challenge to build your Success

Faster, better and cheaper - this is the new challenge for machine designers!

Increasing demands regarding the productivity of complex system machines, and thus more flexible machines which run at highest efficiency levels, now require new intelligent technical solutions that enhance future growth.

Bonfiglioli has implemented a precise and detailed strategy to precisely achieve this objective!

Bonfiglioli Mechatronic Drives & Solutions division is born with the mission to improve profitability by acting as a riskless partner and a provider of energy-efficient solutions over the total life cycle in the field of industrial automation.

Our Expertise from start to finish!

Two Centres of Excellence drive MDS'innovation:

- Bonfiglioli Vectron in Germany, with strong technical, R&D and manufacturing capabilities with regard to electronic components, and most notably inverters and servo drives;
- BMR (Bonfiglioli Mechatronic Research), situated in Rovereto (Trento, Italy) offering strong R&D capabilities and providing innovative new solutions for your specific needs. BMR is a production facility where new mechatronic solutions become reality.

The key to our MDS'success is the strongest technical support from our specialist DSC (Drive Service Centre team). They accompany you throughout the entire installation's life cycle, from the initial concept to design and commissioning.

SERVICE

One-Stop Shop for your mechatronic applications

As a competent technology partner, our engineering specialists are **building together with you tailored and forward-looking integrated solutions to meet the individual needs and to deliver mechatronic energy-efficient for your application.**

Bonfiglioli servopackage includes all the components required for a complete automation solution in one coordinating product package:

- HMI – Bonfiglioli Human Machine Interface
- Programmable controller (ANG, ACU, AGL)
- Highly dynamic servomotors with various feedback devices - BMD series
- Precision planetary gearboxes (TQ, TQF, TQK, TR, MP, LC, LCK, SL)
- Precision bevel gearboxes (KR)
- "Ready-to-use" accessories (cables, chokes, filters, etc.)

Benefits

- Highest precision and dynamic
- Strong and compact
- Highest radial and axial load capacities
- Highest tilting stiffness
- Quiet operation

Benefits

- High precision & dynamic
- Frequent reverse cycle
- Highest power density

Benefits

- Energy saving
- Simplified system solution
- Wide constant torque
- Accurate torque and speed control
- Highest power density

Complete automation Servo Package from a single supplier!

Focusing on the sizing service

Bonfiglioli is your partner assisting you in sizing, fine tuned optimization and selection of a drive train.

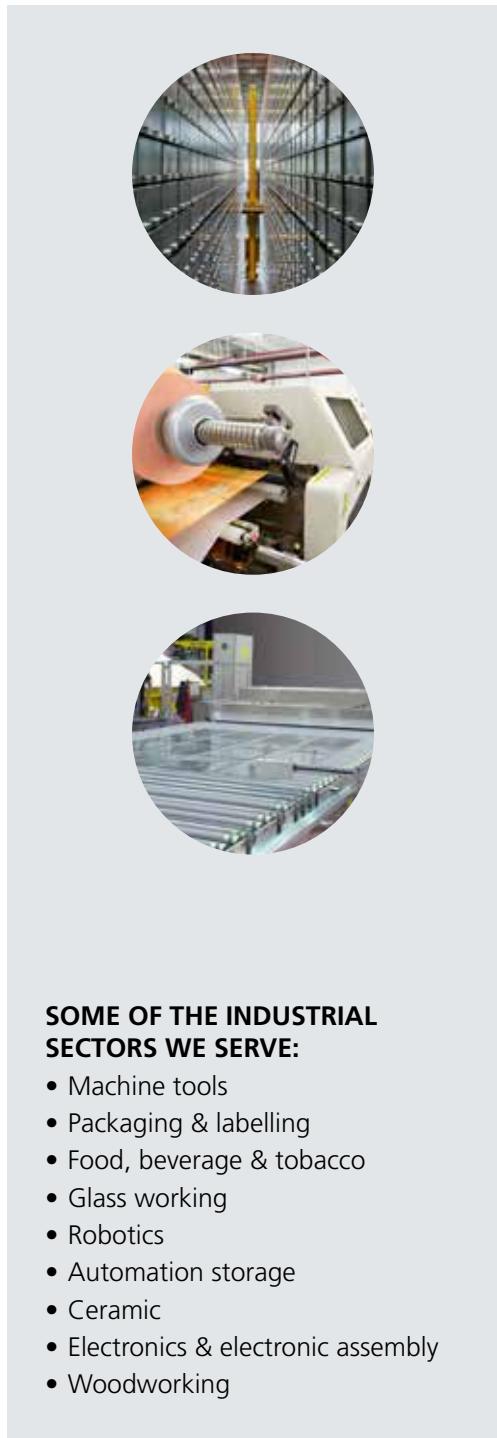

Our attention is focused in designing and manufacturing products for your motion requirements, but we also have implemented servo tools that make your design process easier. We are able to optimize the servopackage avoiding over sizing that increases the initial system cost as well as the ongoing operating cost of a servo system.

Bonfiglioli optimizes the efficiency of drive trains by analysing and assessing energy saving potential in detail.

A reliable partner for your business

Bonfiglioli Riduttori brings decades of experience supporting customers across a broad spectrum of industry sectors. Our industry expertise means we understand your applications: product and requirements must fit and form a solution that matches your application. Our tailored-solutions to always offer you a complete approach.

SOME OF THE INDUSTRIAL SECTORS WE SERVE:

- Machine tools
- Packaging & labelling
- Food, beverage & tobacco
- Glass working
- Robotics
- Automation storage
- Ceramic
- Electronics & electronic assembly
- Woodworking

PACKAGING & LABELLING

Sharing the value of our work with you

Our team is fully dedicated to continuous improvement in the fields of quality, safety and the environment, across the entire value chain, from the smallest supplier to the end customer.

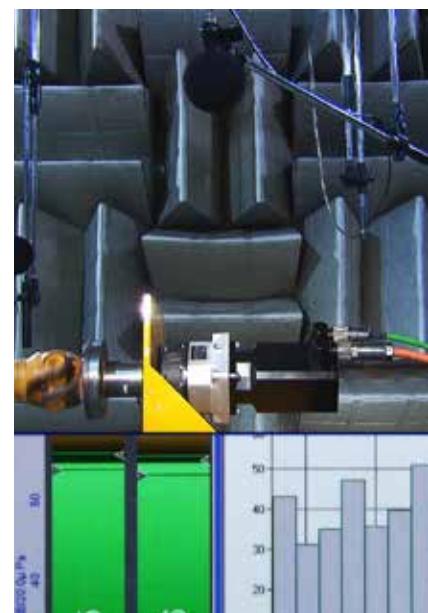

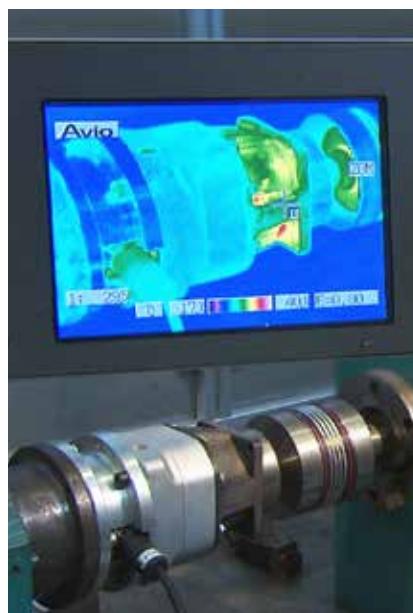

Bonfiglioli management systems are certified to ISO 9001: 2008, ISO 14001 and OHSAS 18001, while our products are covered by international certifications.

Product reliability, excellence and innovation make Bonfiglioli a preferred partner.

Gear Motor Parameters

Symbol	U.m.	Description
$A_{2/3\ max}$	[N]	Admissible axial force on shaft
$A_{2/3'\ max}$	[N]	Axial force acting simultaneously with radial force
C_B	[Nm]	Constant for bearing's lifetime calculation
C_t	[Nm/arcmin]	Torsional stiffness
f	-	Factor ratio between axial and radial force
f_d	-	Thermal derating factor
f_n	[Hz]	Rated frequency
f_T	-	Temperature adjusting factor
f_z	-	Cycle factor
i	-	Gearbox ratio
I_a	[A]	Current at maximum acceleration torque (M_{a2})
I_b	[A]	Brake current
I_n	[A]	Current at rated torque (M_{n2})
I_p	[A]	Current at emergency stop torque (M_{p2})
I_0	[A]	Current at stall torque (M_{02})
J_b	[kg cm ²]	Brake moment of inertia
J_1	[kg cm ²]	Moment of inertia at motor shaft
K_e	[mV/min ⁻¹]	Back EMF constant
K_n	-	Speed constant
K_p	-	Gear motor parameter for calculating the thermal derating factor (f_d)
L_{pp}	[mH]	Stator phase-phase inductance
L_z	[mm]	Factor for bearing lifetime calculation
L_{10h}	[h]	Bearings basic rating life
Δm_b	[kg]	Mass increase with brake
Δm_i	[kg]	Mass increase with additional inertia
m	[kg]	Mass without brake/ flywheel
M_{a2}	[Nm]	Maximum acceleration torque
M_b	[Nm]	Brake torque
M_{b2}	[Nm]	Brake torque on shaft
M_{n2}	[Nm]	Rated torque
M_{p2}	[Nm]	Emergency stop torque. 1000 times during service life of the gearbox
M_{th2}	[Nm]	Equivalent thermal torque
$M_{T2\ max}$	[Nm]	Maximum shaft tilting moment
M_{02}	[Nm]	Stall torque
M_2	[Nm]	Gear motor torque at equivalent speed ($n_{2\ EQU}$)
n_{a2}	[min ⁻¹]	Maximum permissible speed at maximum acceleration torque (M_{a2})
n_{n2}	[min ⁻¹]	Rated speed
p	-	Bearing lifetime exponent
P_b	[W]	Brake electrical power at 20 °C
P_n	[kW]	Rated power
R_{pp}	[Ohm]	Stator phase-phase resistance
t_1	[ms]	Brake engaging time
t_2	[ms]	Brake release time
V_b	[V _{DC}]	Brake DC voltage
V_n	[V _{AC}]	Gear motor rated voltage
φ_R	[arcmin]	Reduced backlash is calculated in static conditions and with the application of a torque equal to 2% of the gear unit rated torque
φ_s	[arcmin]	Standard backlash is calculated in static conditions and with the application of a torque equal to 2% of the gear unit rated torque
2p	-	Number of poles

Application Parameters

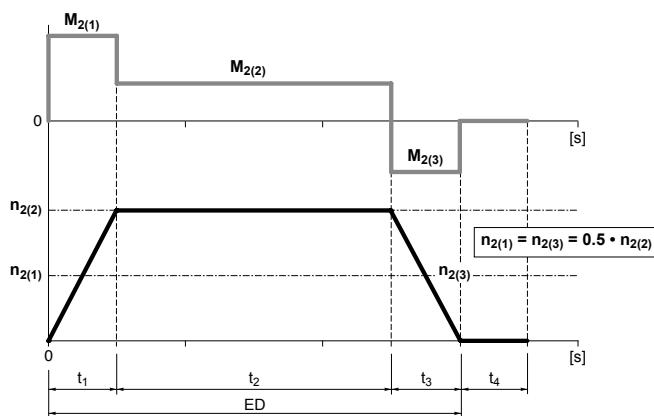

Symbol	U.m.	Description
A_2	[N]	Axial force on shaft
$A_{2\text{ EQU}}$	[N]	Equivalent axial force applying on shaft
$A_{2\text{ MAX}}$	[N]	Maximum axial force applying on shaft
ED	[s]	Duration of the duty
ED%	[%]	Cyclic duration factor
$L_{10h\text{ TARGET}}$	[h]	Bearings desired basic rating life
$M_{2(1)} \dots M_{2(n)}$	[Nm]	Torque at times $t_1 \dots t_n$
$M_{2\text{ EQU}}$	[Nm]	Equivalent torque
$M_{2\text{ MAX}}$	[Nm]	Maximum torque in case of emergency
$M_{2\text{ PEAK}}$	[Nm]	Maximum torque of the load diagram
$M_{T2\text{ EQU}}$	[Nm]	Equivalent shaft tilting moment
$M_{T2\text{ MAX}}$	[Nm]	Maximum permissible shaft tilting moment
n_{MAX}	[min-1]	Maximum speed of the speed diagram
$n_{2(1)} \dots n_{2(n)}$	[Nm]	Speed based on the times $t_1 \dots t_n$
$n_{2\text{ EQU}}$	[min-1]	Equivalent speed
R_2	[N]	Radial force on shaft
$R_{2\text{ EQU}}$	[N]	Equivalent radial force applying on shaft
$R_{2\text{ MAX}}$	[N]	Maximum radial force applying on shaft
T	[°C]	Ambient temperature
$t_1 \dots t_n$	[s]	Operating time
t_{Σ}	[s]	Cycle duration including break pause
Z	[1/h]	Number of cycles per hour

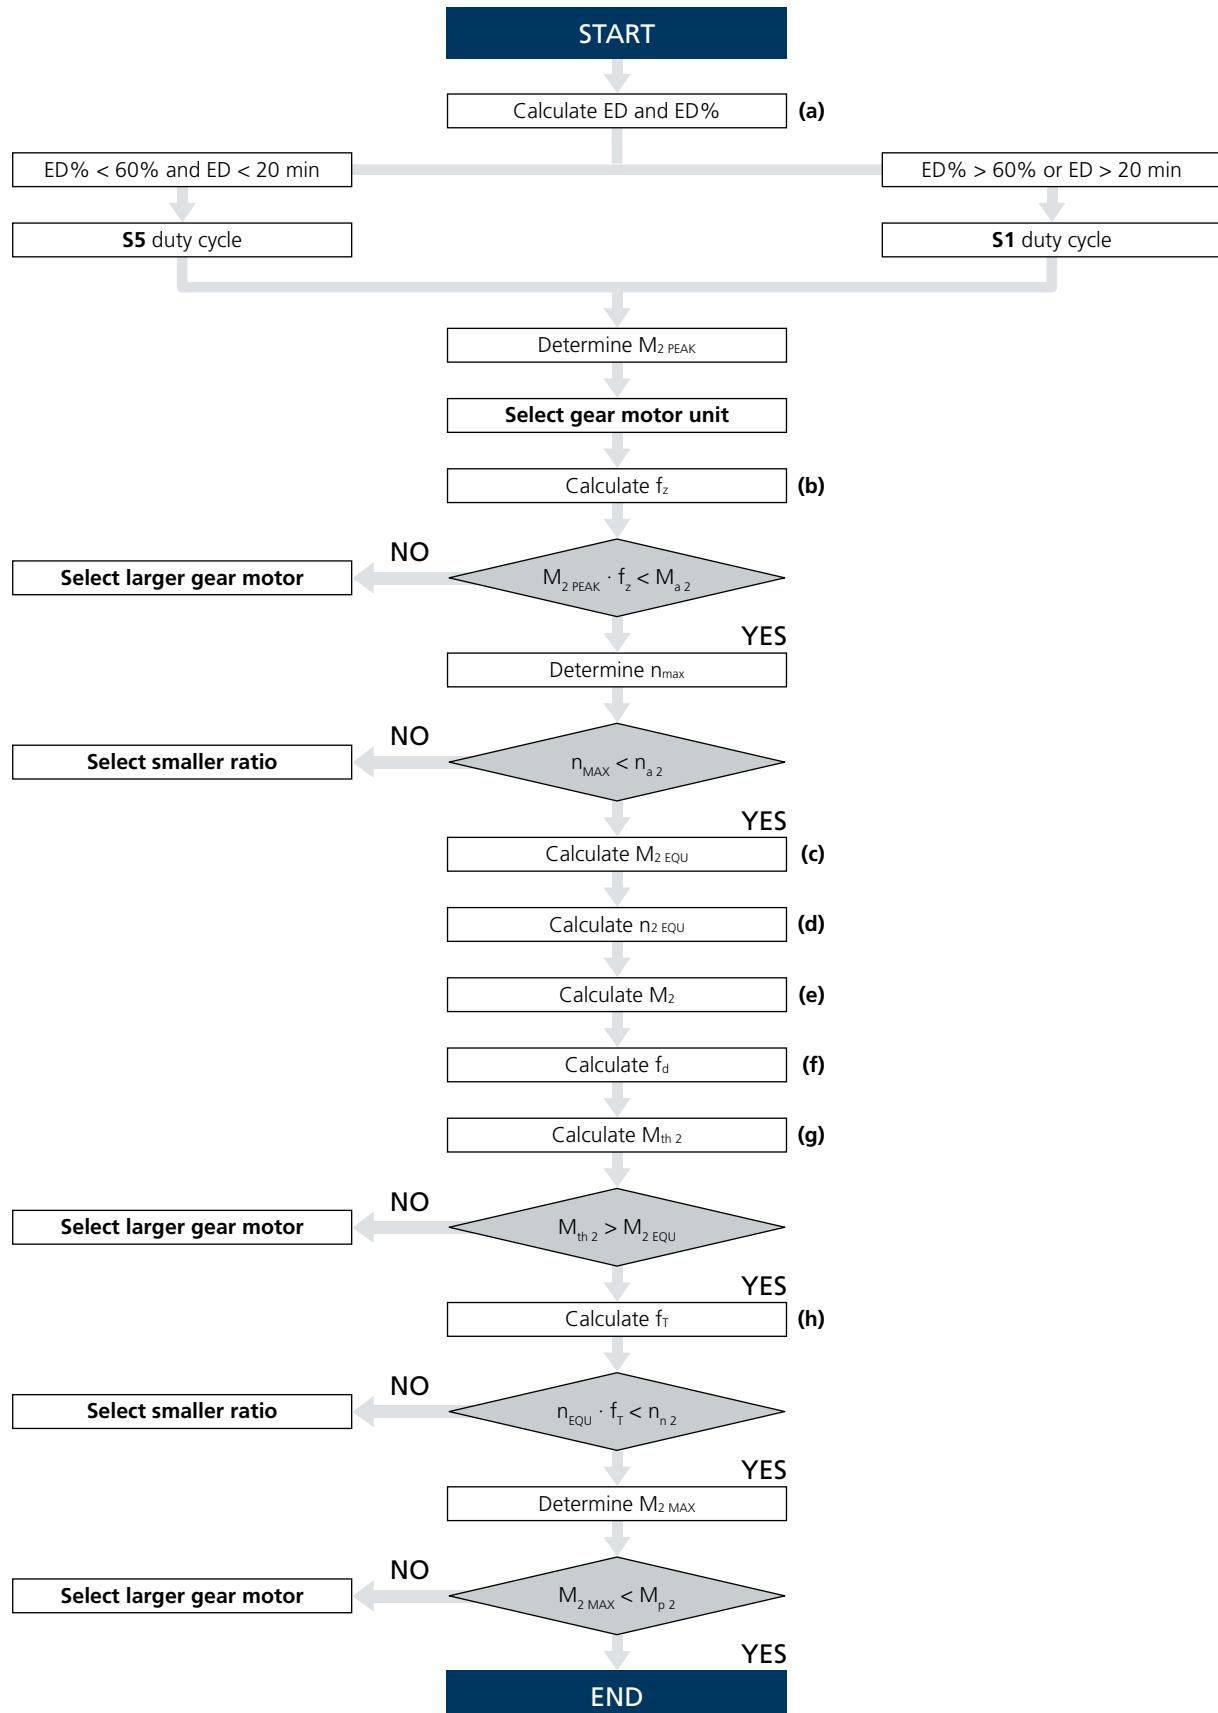

Selecting the gear motor

(a)	Cyclic duration factor Duration of the duty	ED% [%]	$ED\% = \frac{ED}{t_{\Sigma}} \cdot 100$
		ED [s]	$ED = t_1 + t_2 + \dots + t_n$
(b)	Cycle factor (For Z>6000 please contact us!)	f_z	-
			
(c)	Equivalent torque	$M_{2\text{ EQU}}$ [Nm]	$M_{2\text{ EQU}} = \sqrt[3]{\frac{ n_{2(1)} \cdot t_1 \cdot M_{2(1)} ^3 + \dots + n_{2(n)} \cdot t_n \cdot M_{2(n)} ^3}{ n_{2(1)} \cdot t_1 + \dots + n_{2(n)} \cdot t_n}}$
(d)	Equivalent speed	$n_{2\text{ EQU}}$ [min ⁻¹]	$n_{2\text{ EQU}} = \frac{ n_{2(1)} \cdot t_1 + n_{2(2)} \cdot t_2 + \dots + n_{2(n)} \cdot t_n}{t_{\Sigma}}$
(e)	Gear motor torque at equivalent speed $n_{2\text{ EQU}}$	M_2 [Nm]	$M_2 = M_{0,2} + (M_{n,2} - M_{0,2}) \cdot (n_{2\text{ EQU}} / n_{n,2})$
(f)	Thermal derating factor	f_d	-
			$f_d = 0.9 - K_p \cdot (n_{2\text{ EQU}} \cdot i / 40000)^2$
(g)	Equivalent thermal torque of the gear motor	$M_{th,2}$ [Nm]	$M_{th,2} = M_2 \cdot f_d$
(h)	Temperature adjusting factor	f_T	-

BMS

Bonfiglioli Motion Solution

Bonfiglioli Motion Solution (BMS) represents the edge of products integration. BMS is the result of the deep knowledge Bonfiglioli has in precision planetary gearboxes and low inertia permanent magnet servomotor technologies.

Compared to solutions based on separate units, interfaced BMS ensures several competitive advantages, such as:

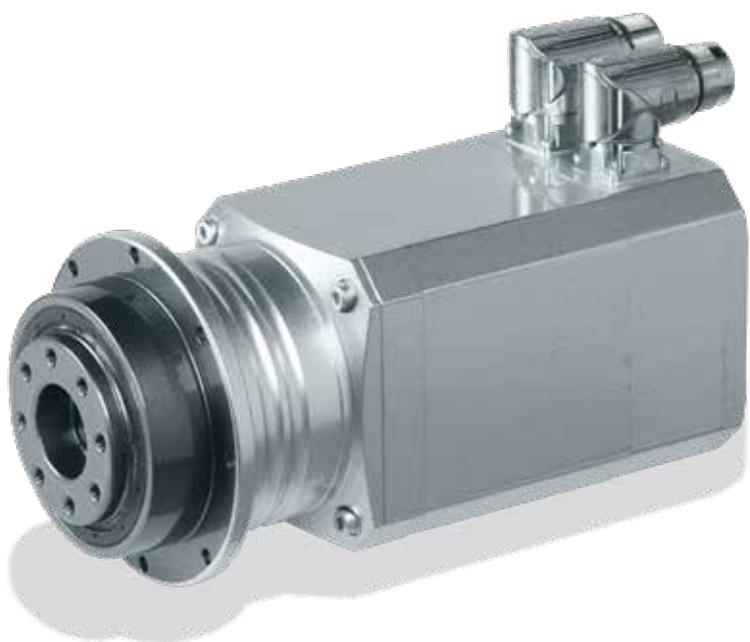

- reduced outline dimensions
- maximized performances thanks to optimized gear motor selection
- longer lifetime
- higher stiffness
- top in class energy efficiency

Low-backlash planetary gearboxes of the BMS series feature a flanged output shaft and are perfectly suited for high demanding applications in term of stiffness and radial load.

In combination with top class torque density and dynamics servomotors, BMS perfectly matches the performance demand of every motion control application.

BMS series provides a straightforward selection of the compact unit using a unique selection method.

When dynamics and high precision are required, and compactness makes the difference, it is a relevant advantage to have a mechatronic product easy to select, order and install.

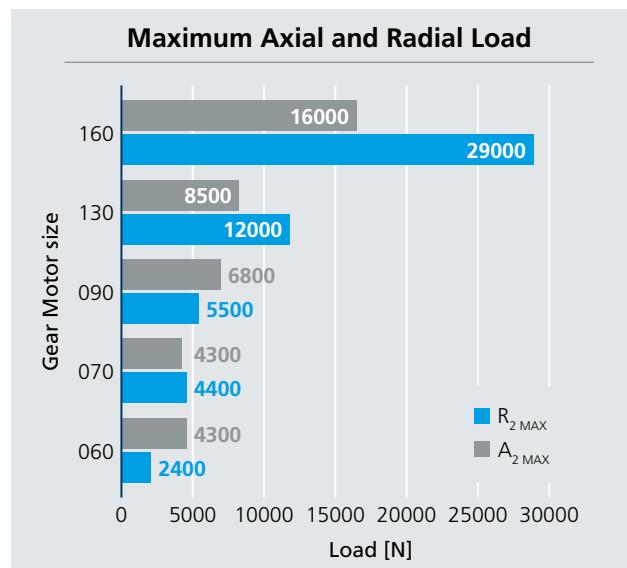

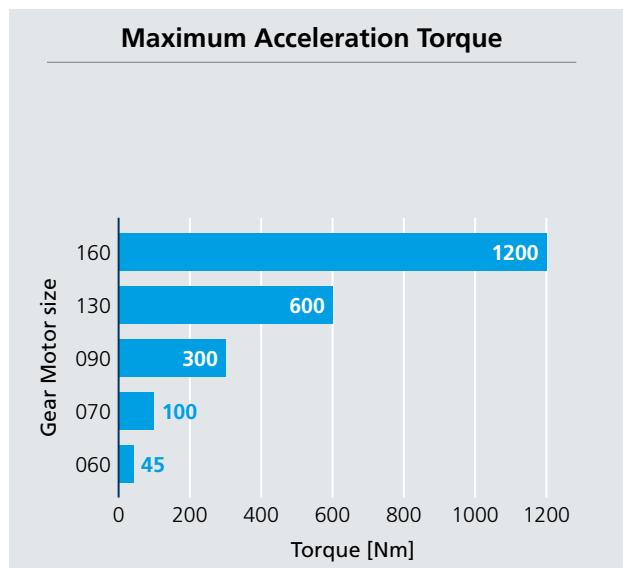

BMS features

- Output torque: 8... 800 Nm
- Output speed: 43... 875 rpm
- Designed for continuous duty & intermittent duty
- Universal mounting position
- Power supply: 230 & 400 VAC
- Two classes of precision:
 - 1-stage unit backlash: standard $\varphi_s \leq 5'$ - reduced $\varphi_r \leq 3'$
 - 2-stage unit backlash: standard $\varphi_s \leq 7'$ - reduced $\varphi_r \leq 5'$
- IP65 degree of protection
- Ambient temperature -20 °C... +30 °C
- Lubrication optimized for S1 and S5 duty types

Duty	BMS 060... BMS 160
S1 (continuous)	Synthetic oil viscosity ISO VG 220
S5 (intermittent)	NLGI grease consistency 00

Distribution of nominal torque M _{n2} [Nm]

BMS 160	-	-	-	-	800	800	800	800	800	800	800	-

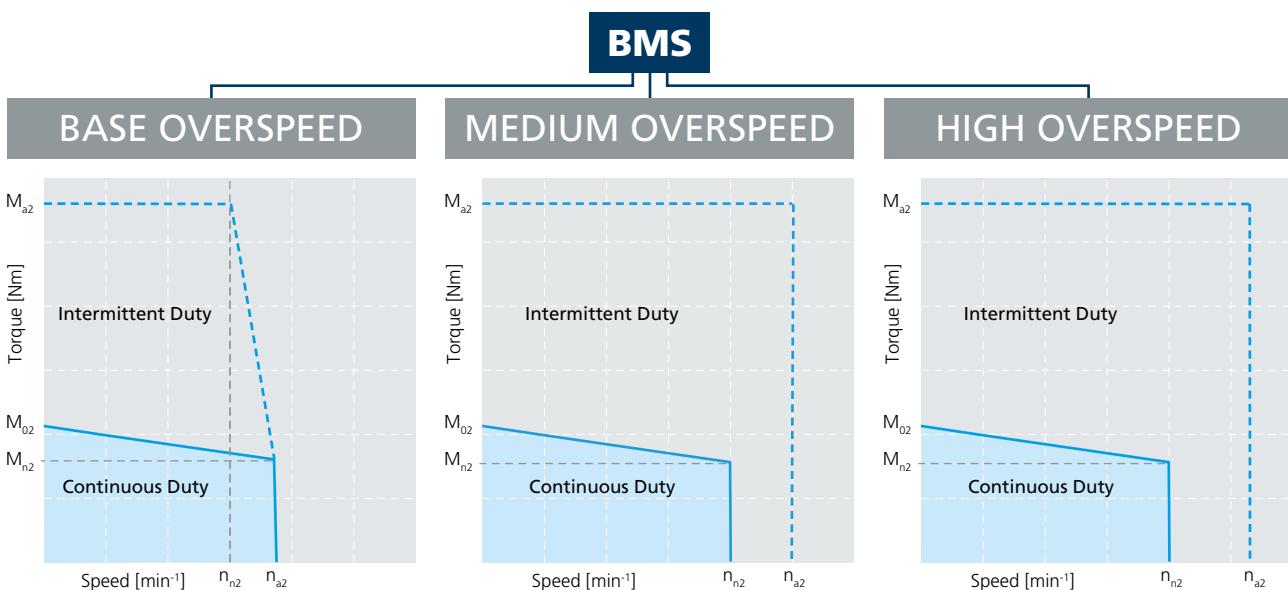

BMS overspeed

BMS gear motor rating is defined by the torque-speed selected with the overspeed variant. The permissible operating range corresponds to the area in the torque-speed characteristics limited by the thermal, electrical and mechanical limit curves.

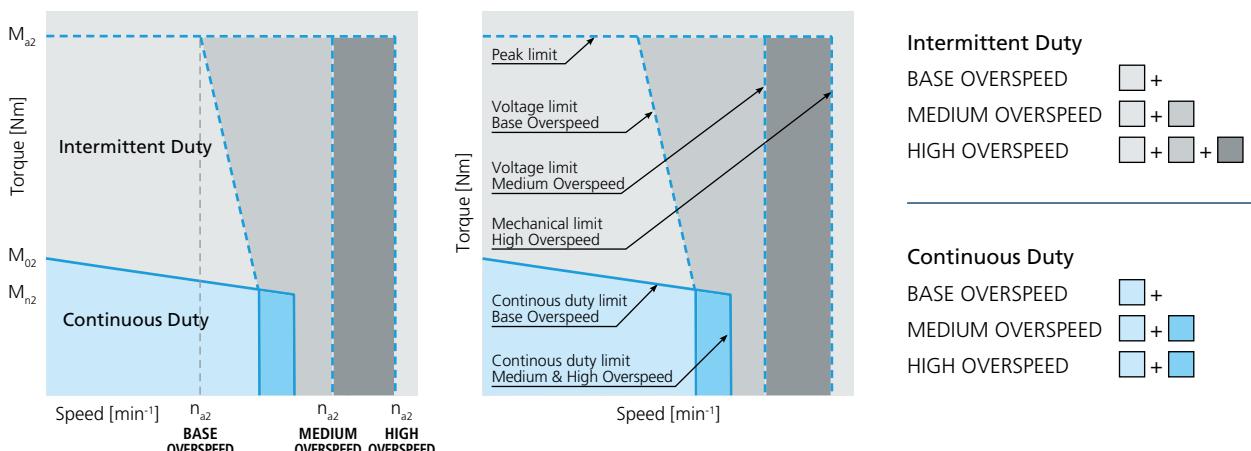

The continuous operating zone is enclosed by torque curve for S1 duty up to the intersection with the voltage limit or the mechanical limit curve. Continuous duty above the S1 characteristic curve is not thermally permitted for the gear motor.

The intermittent duty zone is the area between the short-term peak torque curve and the voltage limit or the mechanical limit curve.

According to the application requirements, in terms of speed-torque and operation cycle, it is possible to select the suitable gear motor choosing between the BASE (B), MEDIUM (M) or HIGH (H) overspeed variants.

The following diagrams highlight the extension of the gear motor operating areas according to the selected overspeed (B, M, H). Applications that need high torque overloads at high speed require a MEDIUM or HIGH overspeed variant. On the other side, the selected overspeed affects the drive selection: the higher the maximum speed n_{a2} the higher the required current I_a .

Feedback devices

Bonfiglioli BMS Compact Servo Gearmotor series is available with different feedback devices. Available feedback devices are resolver and absolute single-turn and multi-turn encoders. All available feedback devices are supported by Bonfiglioli Vectron frequency inverter - Active Cube series.

The resolver is a passive wound device consisting of a stator and rotor elements excited from an external source. It produces two output signals that correspond to the sine and cosine angle of the motor shaft. This is a robust and accurate absolute device, capable of withstanding high temperatures and high levels of vibration. Positional information is absolute within one turn.

Available absolute encoders use a high precision optical disc or a capacitive measuring principle to provide the absolute rotor position. The high resolution performed is based on a combination of absolute data, transmitted with a serial link, and incremental sine/cosine signals. The single-turn absolute encoder has an absolute positional information only within one turn while the multi turn absolute encoder is provided of extra gear wheels that account for several shaft revolution.

Thermal protection

BMS compact gear motors are equipped with a thermal protector to avoid windings temperature exceeding the limit of F insulation class (155 °C). The thermal protectors have a double insulation level. Available thermal protectors:

PTC variant

A PTC thermistor rated 150°C is placed into the motor winding. The PTC thermistor resistance curve is in accordance with DIN 44081-82.

KTY variant

A KTY silicon semi-conductor resistance sensor (KTY84-130 type) is placed into the motor winding. The working temperature range is -40 °C... +260 °C.

TC1 variant

A Platinum resistance temperature sensor (PT1000 type) is placed into the motor winding. The PT1000 characteristic is in accordance with IEC 60751: 2008, tolerance class B. The working temperature range is -40 °C... +250 °C.

Electromechanical holding brake

The BMS gear motor is available also with an electromagnetic holding brake. The brake is for use as an holding brake with motor shaft stationary. Do not use it as a dynamic brake, except for emergencies as main supply failure. The brake variant increases both length and weight of the gear motor. Please note that the brake variant is not available when the F1 flywheel/additional inertia variant is selected.

Data of the available brake for each gear motor size are summarized in the following table. The braking torque M_b refers to the motor shaft and has to be multiplied by the gearbox ratio i .

$$M_{b2} = M_b \cdot i$$

Motor size	$M_{b\ 20\ ^\circ C}$	$M_{b\ 100\ ^\circ C}$	V_b	I_b	$P_{b\ 20\ ^\circ C}$	J_b	Δm_b	t_1	t_2

Additional flywheel / inertia

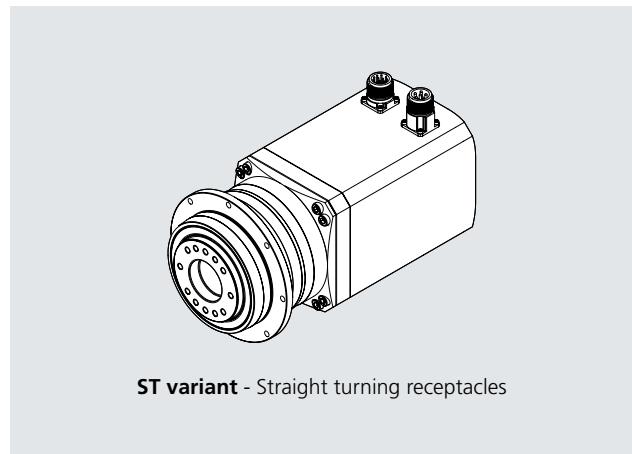

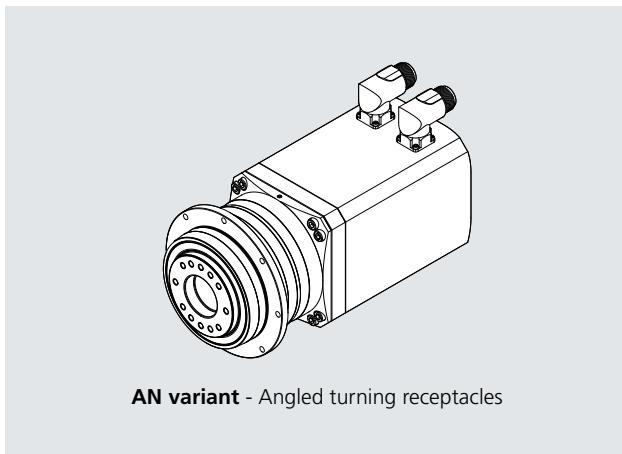

BMS compact servo gear motor series is provided optionally with additional flywheel / inertia (F1 variant).

The additional flywheel / inertia variant increases both length and weight of the gear motor.

Motor size	J_f	Δm_f
	Kg cm ²	kg
065A	0.5	0.4

170C		

Connections

The power and feedback device connections of the BMS compact gear motor are provided by means of separate metal circular receptacles. The available circular connectors are angled turning receptacles (AN variant) or straight receptacles (ST variant).

Power connections

The 8-pin power connector includes the pins of the motor supply and the ones for the brake supply (if provided).

Cables

Cables for power supply and feedback device complete the offer of the BMS compact servo gear motor. Three standard cable lengths available (3m, 5m and 10 m). Custom lengths on request.

Power cables

Power cables can be recognized by the orange colour according to Desina standard. The conductors cross-section depends on the motor nominal current.

The power cable terminates on the inverter side with flying leads covered by ferrules for connections with screw terminals. On the motor side, the power cable is equipped with a metal circular plug with bayonet technology for an easy and sure connection.

The power cables fulfil the following technical requirements:

Technical Data

Properties	Oil resistant shielded cable for dynamic laying
Conductor	Tinned Stranded Cu wire complying with IEC 60228 Cl 5 / 6
Outer Sheath	PUR or equivalent thermoplastic material Colour: orange RAL 2003
Inner Sheath	PP or TPE
Tinned Cu braided Shield	Coverage overall screen > 80%

Electrical Data

Nom. Volt. Power cores	U ₀ /U 600/1000V
Nom. Volt. Control cores	U ₀ /U 300/500V
AC Test Volt. Power cores	4 kV
AC Test Volt. Control cores	1 kV
Insulation Resistance	> 5 MΩ/km

Mechanical Data

Service Temperature	-15 / +80 °C
Minimum Bending Radius	10 x Cable diameter
N° bending cycles	≥ 10 ⁶
Max Speed	≥ 180 m/min
Max Acceleration	≥ 15 m/s ²

Standard and Certifications

UL/CSA, RoHS, DESINA

The cable ordering code comprises five fields as follows:

MPC	3	15	NB	C3
Connector size and type				
C3 8-pin connector, motor with feedback, sizes 65... 145				
C4 8-pin connector, motor with feedback, size 170				
Brake wires				
NB Without brake wires				
B With brake wires				
Phase wire section				
015 1.5 mm ²				
025 2.5 mm ²				
040 4 mm ²				
100 10 mm ²				
Cable length				
03 3 m				
05 5 m				
10 10 m				

The following table shows the suggested combination of power cable designation and motor size according to the selected overspeed and nominal voltage supply. Field XX refers to the cable length (03, 05, 10), while field YY refers to the brake variant (NB, B): see previous page for fields description.

170C	MPC XX 100 YY C4					

Cables

Signal cables

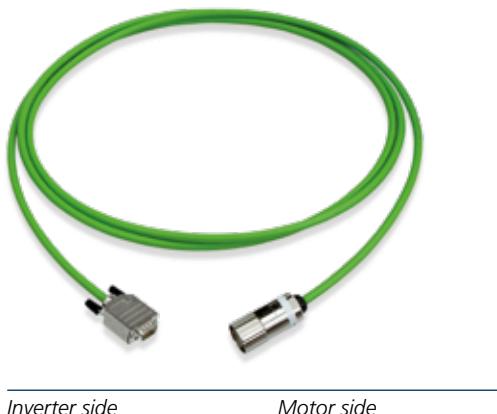

Signal cables are recognizable by the green colour according to Desina standard. The conductors number, their cross-section and their terminal type depend on the transducer typology supported by the cable.

Cables are available for connection for every feedback option. On the motor side, the power cable is equipped with a metal circular plug with bayonet technology for an easy and sure connection.

On the inverter side, the cable end can be executed with two different terminations:

- with SUB-D male connector for connection with corresponding SUB-D female of the module interface.
- with ferrules for connection to screw terminals of the module interface.

Connections layouts are dedicated to Bonfiglioli Vectron interface modules.

The signal cables fulfil the following technical requirements:

Technical Data	
Properties	Oil resistant shielded cable for dynamic laying
Conductor	Tinned Stranded Cu wire complying with IEC 60228 Cl 5 / 6
Outer Sheath	PUR or equivalent thermoplastic material Colour: green RAL 6018
Inner Sheath	PP or TPE
Tinned Cu braided Shield	Coverage overall screen > 80%

Inverter side

Motor side

Electrical Data	
Nominal Voltage	30 V
AC Test Voltage	1500 V
Insulation Resistance	> 10 MOhm/km
Capacitance strand/strand	< 150 pF/m

Mechanical Data	
Service Temperature	-20 / +80 °C
Minimum Bending Radius	10 x Cable diameter
N° bending cycles	≥ 10 ⁶
Max Speed	≥ 180 m/min
Max Acceleration	≥ 15 m/s ²

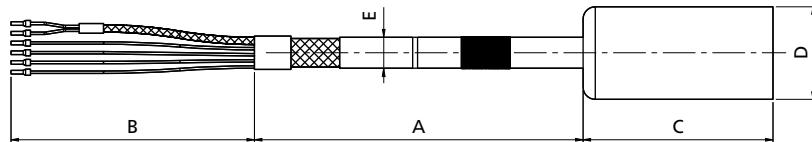

Standard and Certifications

UL/CSA, RoHS, DESINA

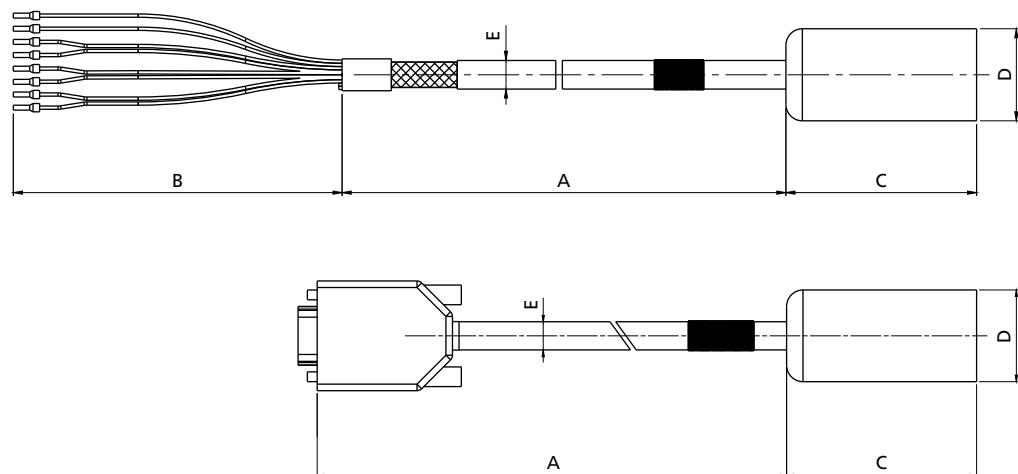

The ordering codes of the signal cables are described in the following table:

Feedback device	Inverter side termination	Inverter feedback module	Cable length

Bonfiglioli worldwide presence

Bonfiglioli is located in regions and countries around the world that enable us to provide faster sales and service to customers.
We are around the world, and around the corner.

LOCAL SUPPORT

Sales, Customer Service,
Warranty, Tech support,
Spare parts

21 BRANCH OFFICES IN 15 COUNTRIES

WORLDWIDE DISTRIBUTION NETWORK

Bonfiglioli is your partner worldwide for power transmission and motion control

Customer satisfaction has always been one of Bonfiglioli's key values. It is pursued around the world, and in a wide range of contexts, by a network of subsidiaries located in 17 countries and on 5 continents.

Each subsidiary provides rapid and efficient pre-sales and after-sales service, and can guarantee prompt deliveries from local assembly plant and warehouses.

In addition to our directly controlled subsidiaries, Bonfiglioli can also rely on an extensive network of authorised dealers, selected for their ability to guarantee excellent pre-sales and after-sales assistance.

To give everybody the chance to purchase a Bonfiglioli product - anywhere.

This is the ambitious objective that drives the development of our added-value sales networks, off and on-line.

BEST (Bonfiglioli Excellence Service Team) is one of the most modern sales organisations in the field of power transmission.

Our BEST partners can benefit from our local assembly plant and warehouses, our training courses and tools, and our promotional activities.

For the first time ever, manufacturer and distributors are working together from the product assembly stage and in the design of new applications, in a sharing process that sees one party transferring know-how and technology and the other partly providing a thorough knowledge of the local market.
